PREFACE

This document contains the basic payload data for the MCC configuration on the OSTA-1 payload. Sections 1 through 10 comprise the MCC Level D configuration (data pack), section 11 contains the collection of Ground Statement of Requirements (GSR's) for additional Level A, B, and C configuration, and section 12 contains a description of user-supplied ground support equipment. This document is issued as an annex to the Payload Integration Plan (PIP), JSC-14015.

All data presented in this annex have been supplied and verified by the payload user and his staff. Corrections and updates will be made as scheduled via the PIP.

Comments and/or corrections to these data should be directed to Janis Plesums, (713) 483-2845, code CH63, NASA JSC.

SECTION 1
DATA PACK DESCRIPTION

This data pack document details configuration data for the JSC MCC display and control facilities in support of the STS-2 payload operations. The requirements stated in each of the data pack sections will be submitted to the Ground Data Systems Division (GDSD) for implementation.

NOTE: Detailed procedures for operating the Payload Operations Control Center (POCC) facilities configured in this document will be provided in various training guides and console handbooks.

SECTION 2
POCC FACILITIES AND CONSOLE CONFIGURATIONS

This section contains the floor plan of the POCC area of the Mission Control Center (MCC) indicating major facilities and consoles with designated positions. Each console contains voice communications, TV monitor display capability, event indicator modules, and unique capabilities as indicated. Also presented in this section are detailed configurations of the POCC consoles.

Listed below are explanatory notes found in the floor plan:

OH - Overhead TV monitor

OTV - Opaque TV

VR - Analog/event video recorder (17-pen)

SCR - Analog/event stripchart recorder (10-pen)

E - Event indicator module (36-event)

SMK - Summary message enable keyboard

CMD - Command modules

SECTION 3
CONSOLE INITIALIZATION

A Mission Control Center console can be initialized for real-time or simulation support, with live, simulated, or playback data. This section specifies the data type and the support mode in which the POCC consoles are to be initiated.

SECTION 4
EVENT MODULE

4.1 INITIALIZATION

The format for each event module is variable and can be driven with various types of data (i.e., real-time, playback, simulation). Section 4.1 specifies the format, the data type, and the mode for each of the POCC console event modules.

NOTE: Each module is initiated as indicated; different formats may be selected in real-time by the console operator.

VARIABLE EVENT MODULE INITIALIZATION REQUIREMENT INPUT FORM EXPLANATION:

DATA PACK ACRONYM	Eg... GUIDANCE, BOOSTER, FLIGHT CONTROL, EMES,...
CONSOLE NUMBER -	Enter the Console number.
MODULE NUMBER -	Enter the module location designation number. This number will always be from '01' thru '19' for a variable event module.
FORMAT NUMBER -	Enter the format number of the 'variable event format' that is required to initialize the variable event module.
DATA TYPE -	Enter the type of data required to drive the variable event format that has been designated in the 'FORMAT NUMBER' entry. Data Types: REALTIME, SIMULATION, PLAYBACK 1, PLAYBACK 2
FLIGHT -	Enter the Flight ID required for this module upon initialization.

Note: Each Variable Event Module may be initialized to a different flight. They may be selected (via MSK) to a different flight in real-time.

4.2 FORMAT DEFINITION

Section 4.2 defines the event module formats to be used during operations support. Overlays are made for each format and are provided to each console as required.

- Event Light Color Conventions

Red - Analogs or critical events that are limit-sensed and annunciated onboard (FDA or C&W)

Amber - (1) Analogs or events that are limit-sensed on the ground only

(2) Off-nominal or out-of-configuration event

Green - Nominal configuration

White - Nominal configuration where flip-flop might be required in conjunction with green

Blue - Ground processing or configuration type events, e.g., inhibit ground limit sensing, initiate plots, or special computation

VARIABLE EVENT FORMAT DETAIL INPUT FORM EXPLANATION:

DATA PACK ACRONYM - Eg... GUIDANCE, BOOSTER, FLIGHT CONTROL, EMES,...

EVENT FORMAT NUMBER - When the DDD control mode is selected (MSK), the four MSK thumbwheels will represent the event format and console-module number. The left three thumbwheels will represent the event format number.

FLIGHT - Flight ID.

DATA TYPE - REAL TIME, SIMULATION, PLAYBACK 1, PLAYBACK 2

OVERLAY TYPE - TYPE A = 36-EVENT INDICATOR OVERLAY FOR USE ON A 36-EVENT INDICATOR MODULE.

TYPE B = 36-EVENT INDICATOR OVERLAY FOR USE ON THE UPPER OR LOWER HALF OF A 72-EVENT INDICATOR MODULE.

NUMBER OF COPIES - Specify the number of copies of physical overlays required.

OVERLAY TITLE - If applicable, specify a name for this overlay.

INDICATOR - This number relates to the physical location (and software identifier) of each 'window/indicator' of the 36-indicator format.

36-EVENT MODULE (TYPE-A)

01	02	03	04	05	06
07	08	09	10	11	12
13	14	15	16	17	18
19	20	21	22	23	24
25	26	27	28	29	30
31	32	33	34	35	36

72-EVENT MODULE (TYPE-B)

01	02	03	04	05	06	07	08	09

19	20	21	22	23	24	25	25	27
28	29	30	31	32	33	34	35	36

COLOR - Colors available are:

RED, GREEN, AMBER, BLUE & WHITE (R,G,A,B & W)

MEASUREMENT NUMBER - Enter the valid (MCC-H computer available) measurement number required displayed.

LOGIC - Enter the display logic required:

Straight, Reverse, Critical , Latched

LABEL - Enter the label required. Labels are limited to 2 Lines/9 Characters each (Space=Character).

SECTION 5
LIMIT SENSE

An analog parameter may be sensed by the ground system for upper and lower operational/critical limits. Indication that a limit-sensed parameter has reached or exceeded its normal operational or safety range may be provided by the event light and on the DTE display. The limit-sensing capability may be disabled or enabled in real time by the console operator using the Summary Message Enable Keyboard (SMEK) module.

This section lists the groups of parameters and the limits to be sensed.

LIMIT SENSE DATA INPUT FORM DEFINITION:

DATA PACK ACRONYM -	Eg... GUIDANCE, BOOSTER, FLIGHT CONTROL, EMES,...
MEASUREMENT NUMBER -	Enter the Measurement Number of the parameter that is required limit sensed. ** A given Measurement Number may be assigned to one and only one Flight Discipline Group. All Measurement Numbers that are required limit sensed must be assigned to a Flight Discipline Group.
UNITS -	Enter the Engineering Units of the parameter to be limit sensed. ACRONYM limited to 8 characters.
OPERATIONAL LIMIT LOW -	Enter the Operational Low Value. Valid with or without a decimal; May be preceded by a '-' or '+' Sign; BLANK defaults to a '+' sign.
OPERATIONAL LIMIT HIGH -	Enter the Operational High Value. Valid with or without a decimal; May be preceded by a '-' or '+' Sign; BLANK defaults to a '+' sign.
CRITICAL LIMIT LOW -	Enter the Critical Low Value. Valid with or without a decimal; May be preceded by a '-' or '+' Sign; BLANK defaults to a '+' sign. This 'value' is to be entered only for Set # 01 of it's Flight Discipline Group. For a given parameter that has 'critical limits' a corresponding set of operational limits must exist.
CRITICAL LIMIT HIGH -	Enter the Critical High Value. Valid with or without a decimal; May be preceded by a '-' or '+' Sign; BLANK defaults to a '+' sign. This 'value' is to be entered only for Set # 01 of it's Flight Discipline Group. For a given parameter that has 'critical limits' a corresponding set of operational limit must exist.
CATEGORY -	Enter the applicable Category or Categories for this measurement number. (Multiple categories may be specified for a given parameter.) The Category Numbers are from 1 thru 64. The 'category' requirements are to be entered only for Set # 01 of it's Flight Discipline Group.

LIMIT SENSE DATA INPUT FORM DEFINITION: (CONT'D)

** THERE IS ONE "CRITICAL ONLY" CATEGORY FOR EACH FLIGHT DISCIPLINE GROUP. THEY ARE AS FOLLOWS:

BOOSTER	FDG-1	CATEGORY-1
FLIGHT COMPUTERS	FDG-2	CATEGORY-2
AVIONICS	FDG-3	CATEGORY-3
EMESB1	FDG-4	CATEGORY-4
EMESB2	FDG-5	CATEGORY-5
PROPULSION	FDG-6	CATEGORY-6
PAYLOADS	FDG-7	CATEGORY-7

FDG - Enter the Flight Discipline Group code.

FDG CODE	GROUP NAME
1	BOOSTER
2	FLIGHT COMPUTERS
3	AVIONICS
4	EMESB1
5	EMESB2
6	PROPULSION
7	PAYLOADS

M/S - Enter the appropriate code:

M = Mission Limit Sense Data
S = Simulation Limit Sense Data

SET # - Enter the limit sense set number within a given Flight Discipline Group (Maximum of 5 Sets are allowed).

** Within a Discipline, all parameters must have the same number of limit sets.

Eg.. If the 'Number of Sets' for FDG-1 = 3, then each Measurement Number of FDG-1 must have operation limits for each 'set of limits' within FDG-1.

SECTION 6
ANALOG/EVENT RECORDERS

6.1 RECORDER CONTROL

A Strip Chart Recorder (SCR) or Video Recorder must be configured by the console operator. Console inputs are made by the operator in real time to accomplish recorder configuration. This section specifies the controlling console for each recorder.

CONSOLE-MODULE-THUMBWHEEL POSITION TO RECORDER FORM DEFINITION:

A GIVEN RECORDER MAY HAVE ONLY "ONE" CONSOLE/MSK/THUMBWHEEL CONTROL ASSIGNMENT.

DATA PACK ACRONYM -	Eg...GUIDANCE, BOOSTER, FLIGHT CONTROL, EMES,...
CONSOLE NUMBER -	Enter the Identification number of the console that is to have the recorder selection capability specified on this form.
MODULE NUMBER -	Enter the Module location designation of the MSK that is to used for recorder selection.
RECORDER THUMBWHEEL POSITION	Identifies the Recorder Select Thumbwheel Positions.
RECORDER NUMBER -	Enter the Recorder ID.
RECORDER TYPE -	Enter the Recorder Type. (10-PEN SCR -- 8 ANALOG/2 TIMING) (17-PEN A/E RCDR -- 8 ANALOG/7 EVENTS/2 TIMING) (100-PEN ER -- 96 EVENTS/4 TIMING) (150-PEN ER -- 144 EVENTS/6 TIMING)

057	____ & ____	PEN GROUP "COUPLING"
058	____ & ____	PEN GROUP "COUPLING"
059	____ & ____	PEN GROUP "COUPLING"
060	____ & ____	PEN GROUP "COUPLING"
061	____ & ____	PEN GROUP "COUPLING"
062	400 & 401 & 402 & 403	24-PEN GROUPS TO THE 100-PEN EVENT RECORDER
063	600 & 601 & 602 & 603 & 604 & 605	24-PEN GROUPS TO THE 150-PEN EVENT RECORDER
064	606 & 607 & 608 & 609 & 610 & 611	24-PEN GROUPS TO THE 150-PEN EVENT RECORDER

NOTE: THERE WILL BE A "SET" OF THESE AES PEN GROUPS FOR EACH DOWNLINK COMBINATION.

THE MAXIMUM ALLOWABLE RANGE FOR USE IN AES FORMAT (MSK CALLUP) SELECTION IS FROM 000 THRU 255 (DECIMAL). THE RANGE OF AES/MSK FORMAT NUMBERS FROM 001 THRU 068 HAVE BEEN RESERVED FOR OD LINK SELECT. ADDITIONALLY, AES/MSK FORMAT NUMBER 000 IS USED FOR AES FORMAT DESELECTION.

SECTION 7
SUMMARY MESSAGE ENABLE KEYBOARD

The Summary Message Enable Keyboard (SMEK) is a multifunction module which permits the console operator to initiate real-time inputs to enable/disable the boundaries of limit-sensed parameters and to generate tabulated data in predefined formats. This section defines the configuration of the SMEK module.

SUMMAY MESSAGE ENABLE KEYBOARD INPUT FORM EXPLANATION:

DATA PACK ACRONYM - Eg...GUIDANCE, BOOSTER, FLIGHT CONTROL, EMES,...

ROOM NO - Enter the room number that the console is located in.

CONSOLE NO - Enter the Console number.

CONSOLE TITLE - Enter the Console Title Eg...COMPUTER SUP

MODULE LOCATION - Enter the Module location designation number. This number will always be greater than 19 for this type of module.

MODULE NAME - Enter 'SMEK'

MODULE TYPE - Enter 'A19/A'

PBI LOC - This number relates to the physical location (and software identifier) of each PBI on this module.

01	06	11	16	21	26	31	36
02	07	12	17	22	27	32	37
03	08	13	18	23	28	33	38
04	09	14	19	24	29	34	39
05	10	15	20	25	30	35	40

CLR - Colors available are:

RED, GREEN, AMBER, BLUE & WHITE (R,G,A,B & W)

LABEL - Enter the label required . Labels are limited to 5 Lines/6 Characters each (Space=Character).

MEASUREMENT - Enter the DPB assigned SMEK measurement number.

SECTION 8
MULTIPLE COMMAND MODULE

The Multiple Command Module (MCM) is a special-purpose module which provides the console operator with the capability of initiating uplink of prestored data. This section defines the configuration of the MCM module.

MULTIPLE COMMAND MODULE (MCM) REQUIREMENTS INPUT FORM EXPLANATION:

DATA PACK ACRONYM -	Eg...GUIDANCE, BOOSTER, FLIGHT CONTROL, EMES,...
ROOM NO -	Enter the room number that the console is located in.
CONSOLE NO -	Enter the Console Number.
CONSOLE TITLE -	Enter the Console Title Eg...COMPUTER SUP
MODULE LOCATION -	Enter the Module Location designation number. This number will always be greater than 19 for this type of module.
MODULE NAME -	MULTIPLE COMMAND MODULE (MCM)
MODULE TYPE -	DRK4
FIELD SELECT PBI -	PBI'S 01 THRU 12. Depression of one of these PBIs selects a field of 32 possible 'commands'. Eg.... PBI-01 depressed will cause lamp-01 of each of the 32 Rear Projection Readouts to illuminate, thereby indicating, for this field select PBI depression, the 'command' which will result from depression of each of the 32 Rear Projection Readouts.
R/O NUM -	THE Rear Projection Readout/Switch number is shown under this header.
LAMP NUM -	The Lamp Number (01 thru 12) of the readout is shown under this header.
LABEL -	For 'Field Select PBI' entries, enter the Command Field Title. Note: Field Titles are limited to 3 Lines/8 Characters each.(BLANK=CHARACTER) For 'R/O NUM' entries, enter the Command Label required. Note: Command Select Labels are limited to 4 Lines/8 Characters each. (BLANK=CHARACTER)
MEASUREMENT -	Enter the Command Parameter Measurement Number as assigned by SLAPS/GDSD.

SECTION 9
VOICE COMMUNICATIONS

Voice communication is provided through numerous communication loops terminated on various keyset stations. These loops permit communications within the MCC, between the MCC and other facilities at JSC, and with other NASA and non-NASA remote facilities. This section defines the configuration of the voice communications keysets.

Listed below are those loops specifically defined by payload operations.

- EXP-1, EXP-2, TD-1, TD-2, TD-4 - Used prelaunch for coordination of payload installation, service operations, and integrated tests between JSC POCC and KSC facilities
- PAYLOAD CONFERENCE - Common loop for coordination within the JSC POCC and associated MPSR
- PAYLOAD DATA - Used to resolve data discrepancies and to establish data requirements
- PAYLOADS - Prime Mission Operations Control Room (MOCR) loop for the Payload Officer to interface with other MOCR operators and supportive personnel in POCC's and MPSR's
- POCC DIRECTOR - Prime loop for interfacing the POCC director by other POCC and flight control team personnel
- PAYLOAD MPSR/PAYLOAD TD - Used to interface with payload support systems personnel within the payload MPSR and used prelaunch, to interface with the KSC Payload Test Director
- USER SUPPPORT ROOM 1, 2, 3, and 4 - Coordination loop used by personnel concerned with the designated payload

SECTION 10
MISCELLANEOUS NON-CONSOLE DISPLAY/CONTROL DEVICES

(TBD)

SECTION 11
LEVEL A, B, AND C REQUIREMENTS

The Statement of Requirements (SR's) in this section have been submitted for OSTA-1.

1. GSR-397: Real-Time Commands (RTC's) for payloads
2. GSR-456: Installation of doors in the POCC
3. GSR-530: Relocation of SMEK module
4. GSR-~~(TBD)~~ 497: POCC DTE displays
5. GSR-(TBD): THRIFT requirements

CH-78-156	SR	NO. GSR-397	REVISION
		DATE May 16, 1978	

TO: FS/Chief, Ground Data Systems Division ATTN: FS5/Fred H. Wrinkle

SUBJECT: Real-Time Commands (RTC's) for Payloads	REQUIRED OPERATIONAL DATE OSTA-1 Mission/OFT-2
	PRIORITY

Background:

The number of RTC's (75 for storage and uplink) baseline in the OFT Level A documentation is insufficient to support the payload command and control function for the OSTA-1 mission.

Reference:

Level A OFT Requirements - Section 10.4.3.4.1

Requirement:

The MCC shall be capable of storing and executing 250 payload RTC's for the OSTA-1 mission. The RTC's will be premission defined in the Orbiter format. Command verification will be accomplished by monitoring payload system data and normal MCC orbiter command verification processing. No special processing is required.

CONCURRENCE:

Mission Manager

					CH

CH6-78-120 **SR**	NO. GSR-456	REVISION
	DATE February 12, 1979	
TO: FS/Chief, Ground Data Systems Division	ATTN: FS2/K. Ramke	
SUBJECT: Installation of Doors in the POCC	REQUIRED OPERATIONAL DATE OFT-2	
	PRIORITY	

Background:

Quick and easy access is required between the Payload Control Room and the User Rooms. Presently, the only access to the User Rooms from the Payload Control Room is via the hallway which is not conducive to good operations. P-tubes are not available in all User Rooms for the easy transfer of information.

Requirement:

Install doors as indicated on the enclosed layout at points A and B. the doors are to open into rooms 212A and 212.

PREPARED BY: CH63/Mason Hagan		APPROVED: (DIVISION CHIEF) Charles S. Harlan

CH6-79-214	**SR**	NO. GSR-530	REVISION
		DATE October 10, 1979	
TO: FS/Chief, Ground Data Systems Division	ATTN:	FS2/D. N. Hogg	
SUBJECT: Relocation of SMEK Module		REQUIRED OPERATIONAL DATE STS-2	
		PRIORITY	

Background:

Current configuration of the JSC POCC consoles provides one Summary Message Enable Keyboard (SMEK) module located in User Support Room 1. Evaluation of operating procedures indicate that a single point of contact is needed to provide coordination and control of all POCC SMEK requirements. This point of control should be located in the Payload Control Room.

Requirement:

Move the SMEK module from console 250 (PAYLOAD 1) to console 257 (PAYLOAD 8).

(See enclosure)

SECTION 12
USER-SUPPLIED GROUND SUPPORT EQUIPMENT

The information in this section indicates the user Ground Support Equipment (GSE) that will be installed in the POCC for OSTA-1.

(TBD)

DISTRIBUTION LIST FOR PAYLOAD INTEGRATION PLAN
JSC-14015 COMPLETED ANNEX NO. 5

STANDARD DISTRIBUTION

NASA JSC
CA/J. F. Honeycutt
CA6/C. L. Stough
CA7/N. T. Buras
CB/Payloads
CF3/M. G. Kennedy
CG3/D. L. Dahms
CG5/W. F. Huning
CG5/J. A. Wegener
CH/C. S. Harlan
CH6/B. L. Kyle
EA3/R. S. Sayers
EC/D. W. Morris
EE4/W. E. Perry

PA/G. S. Lunney
PA/L. E. Bell
PF/L. S. Nicholson
PF/R. A. Moke
PF/H. M. Scott
PH/L. G. Williams
PH/W. J. Huffstetler
PL/C. B. Peterson
SC3/S. Hardee
WA/W. D. Wolhart
WC/M. A. Collins
WC2/D. H. Cordiner
WC2/M. F. Crocker (3)
WC6/E. D. Murrah
WT/R. A. Colonna
WT3/Z. K. Eubanks

Nasa Headquarters
MO-6/C. M. Lee
MOB-6/W. R. L. Tucker

GSFC
860.1/C. B. Knox (5)

KSC

NWSI-D/Repository (25)

Rockwell - Houston
ZC01/Don Hass

Rockwell - Downey
FA89/Data Management (25)

UNIQUE DISTRIBUTION

Project Engineer
PF/G. P. Kenney

Integration Engineer
WC/L. M. Arnim

Technical Integration Engineer
ED4/C. J. Le Blanc

Payload Officer
CH6/J. Plesums

MSFC OFT Pallet Manager
NA01/B. Johnson

Payload Supplier
PF/R. A. Moke

KSC Launch Site Support Manager
CP-OPO/J. Ragusa

Rockwell - Downey
FB95/R. L. Horner
